### 1.Create a Bucket in IBM object storage.

The screenshot shows the IBM Cloud Object Storage console. The left sidebar contains navigation links: Cloud Object Storage, Storage instances, Cloud Object Storage-74, Buckets (selected), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main content area is titled 'Buckets' and includes a description: 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this is a table of buckets with columns: Name, Public access, Location, Storage class, and Created. A 'Create bucket' button is in the top right corner of the table area.

## Output:

The screenshot shows the IBM Cloud Object Storage console. The left sidebar contains navigation links: Cloud Object Storage, Storage instances, Cloud Object Storage-74, Buckets (selected), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main area has tabs for Objects, Configuration, and Permissions. A warning message states: "Warning: All objects in this bucket have public view access." Below this, a message says: "If you're seeing more usage than expected, versions count towards your usage or you may have incomplete uploads [Learn more](#)". A search bar with "Prefix filter" and a "View versions" toggle (set to Off) are present. An "Upload" button is in the top right. A table lists five objects, all named "Image...".

The screenshot shows a web browser displaying a web page with a yellow background. The page features five image thumbnails arranged in two rows: three in the top row and two in the bottom row. Each thumbnail is labeled "CYBERPUNK" at the top and shows a different scene from the Cyberpunk 2077 game, including neon-lit streets and a character in a glowing suit. The browser's address bar shows the file path: "C:/Users/JUBIN/Desktop/Assignment%203/web.html".

**2.Design a chatbot using IBM Watson assistant for hospital. Ex: User comes with query to know the branches for that hospital in your city. Submit the web URL of that chat bot as a assignment.**
